TRANSPLUMB EVENTS

Australian Industry Capability

Transplumb Events — Policy Statement

Transplumb Events is 100% Australian owned and controlled. For more than 25 years we have designed, installed, operated and removed temporary water, wastewater, sewer, gas and hydration infrastructure for major events and commercial projects across Australia.

Our workforce, facilities and equipment are based in Australia. Our head office, warehouse and workshop are in Thomastown, Victoria, and our Queensland operating base is in Burleigh Heads.

Transplumb Events is committed to:

- Delivering our work with an Australian workforce of licensed plumbers and gasfitters, supported by prequalified Australian labour hire and subcontractor partners.
- Owning, maintaining and storing our fleet of pumps, tanks, pipework and plant in Australia, supported by a 24/7 service line.
- Sourcing more than 90% of our equipment, materials and consumables from Australian-based suppliers.
- Buying locally wherever practicable, including sourcing specialist equipment through Australian distributors.
- Developing the capability of Australian suppliers and of our own workforce.
- Providing Australian Industry Capability information to clients and prime contractors when required.

This statement is available to our clients and other interested parties and is reviewed at least annually to make sure it remains accurate.
